6. CUSTOMER LIMITATIONS EG. BUDGET. DEVICES

### 5. AVAILABLE SOLUTIONS PLUSES & MINUSES

- Limited supervision. Farmers who trying to protect crops
  - Limited financial constrains.
  - Lack of man power.

- Automation in irrigation.
- CCTV camera to monitor and supervise the crops.
- Alarm system to give alert while animals attacks the crops.

# 2. PROBLEMS / PAINS + ITS FREQUENCY

from various problems

9. PROBLEM ROOT / CAUSE

- Crops are not irrigated properly.
- Improper maintenance of crops.
- Lack of knowledge among farmers in usage of fertilizers and hence crops are affected.
- Requires protecting crops from Wild animals attacks, birds and pests.

- - Due to insufficient labour forces.
  - Due to various environmental factors such as temperature climate. topography and soil quality which results in crop destruction.
  - Due to high ammonia, urea, potassium and high PH level fertilizers.
  - Crops are damaged and it affects growth.

7. BEHAVIOR + ITS INTENSITY

- Asks suggestions from surrounding peoples and implement the recent technologies.
- Consumes more time in crop land.
- Searching for an alternative solution for an existing solution.

#### 3. TRIGGERS TO ACT

EM

Moisture sensor is interfaced with Arduino Microcontroller to By seeing surrounding crop land with

10. YOUR SOLUTION

- measure the moisture level in soil and relay is used to turn ON and OFF the motor pump for managing the excess water level.
- It will be updated to authorities through IOT. Temperature sensor connected to microcontroller is used to monitor the temperature in the field. The optimum temperature required for crop cultivation is maintained using sprinklers.
- IOT based fertilizing methods are followed, to minimize the negative effects on growth of crops while using fertilizers.
- Image processing techniques with IOT is followed for crop protection against animal attacks.

## 8. CHANNELS of BEHAVIOR

Extract online & offline CH of BE

Using different platforms /social media to describe the working and uses of smart crop protection device.

#### OFFLINE

Giving awareness among farmers about the application of the device.

# 4. EMOTIONS BEFORE / AFTER

installing machineries.

and effective solutions.

- Mental frustrations due to insufficient production of crops.
- Felt smart enough to follow the available technologies with minimum cost.

Hearing about innovative technologies
